

**LEGISLATION STANDING COMMITTEE
COMMUNIQUE #2
May 2014**

Before we complain to our friends and neighbours about something the government has acted or not acted on, ask yourself if you sent your position to the government. If the answer is “yes” you have done your part. If the answer is “no” ... well you know what to do. Saying “the government should know better” is not the answer. Government officials represent their constituents which means they need to hear from their constituents so that they know the actions to take. When Jesus asks you on your final day, when I was hungry, homeless, sick, dying ... I hope you can answer ... Lord you know that I fought long and hard against all injustices for all my brothers and sisters.

In my last communiqué in October 2013 I wrote about Euthanasia not being in our territory or federally; however, that has changed. There are now two bills presented, C-581 & C-582, regarding assisted suicide. Please write or email the government as well as all the opposition parties to let them know that we value all life.

Bill C-442 National Lyme Disease Strategy is at Second Reading and Referral to Committee as of April 29, 2014.

Annamaria M.
Chairperson
